

Tissue Machine Upgrade

COVEY CASE STUDY

Kimberly Clark Australia engaged Covey Consulting to provide a range of mechanical and project services on a project to upgrade one of its tissue machines.

The \$5M project purpose was to increase the bulk of the tissue by modifying the elements within the machine. This required major structural changes to the machine frame.

Process engineering was done “in-house” by the client.

Service provided by Covey Consulting included:

- Mechanical engineering design
- Estimation
- Scheduling
- Tendering
- Quality Assurance
- Site supervision
- Cost control
